Summary

Self-taught web developer who has been building and publishing things on the web since 2015. Lifelong learner passionate about cognitive and learning science. Attendee of web development meetup focused on using tech and data as a mode of civic engagement.

Websites & Projects

Youth-Work Program Matcher - United Way of Greater Philadelphia

- Using Javascript and Google Apps Scripts, created a form-based tool that matches youth up with local vocational and educational programs in order to put them on a path toward gainful employment.
- Generates a CSS-styled HTML e-mail that is sent to youth who complete the form, as well as to matching program directors.

Personal Portfolio Site - benbrophy.io

- Designed and built a fully responsive portfolio site using HTML5, Javascript, jQuery, Photoshop. and CSS3, including CSS Animations, Flexbox, and Grid.
- Utilized Sass, Sass 7-1 architecture, and BEM methodology to create a more organized and efficient workflow.
- Implemented a contact form using PHP which sends an e-mail when users submit the form.

Wedding Website - ilanaandjoe.com

- Designed and built a fully responsive wedding website using HTML5, CSS3, Javascript, jQuery, and Photoshop.
- Implemented an RSVP form that accepted guest information and generated a CSS-styled HTML e-mail that was sent to the bride.

Complete portfolio of projects can be found at benbrophy.io

Professional Work Experience

Speech and Language Pathologist

2013 - Present

- Develop and implement treatment plans using expert knowledge of cognitive science, linguistics, and learning science to improve the cognitive-communication skills of both children and adults.
- Regularly work as part of an interdisciplinary team to realize student and patient goals using exceptional communication and collaborative skills.
